

# Our Solar System

Can you order the planets from closest to farthest?

 Write 1 to 6 in the circles to order them — 1 is closest to the Sun, 6 is farthest away!

✨
☀️ Start at the Sun and count outward! 🪐
✨

|                                                                                                                                                                                    |                                                                                                                                                                                   |                                                                                                                                                                                         |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <br>Saturn<br>   | <br>Mercury<br> | <br>Earth<br>     |
| <br>Mars<br> | <br>Sun<br> | <br>Venus<br> |

 Fun fact: We live on Earth 🌍 — the 3rd one from the Sun!

 Parent key: 1 ☀️ Sun, 2 ☿ Mercury, 3 ♀ Venus, 4 🌍 Earth, 5 🔴 Mars, 6 🪐 Saturn.

☀️ You're a super space explorer! You know the whole solar system!
