

Build Your Own Clock!

Craft a working clock and practice!

 Build a clock! Make your own working clock, then practice setting the times below!

1  Trace a paper plate (or draw a big circle) — this is your clock face!

2  Write the numbers 1–12 around the edge, just like a real clock!

3  Cut two hands from cardboard: one **SHORT** (hour) and one **LONG** (minute)!

4  Pin the hands in the middle with a brad so they can spin!

5  Play! Grown-up calls a time, you move the hands to match!

 Practice with YOUR clock: set the hands to match each time!

Make 2:00!

Make 5:00!

Make 8:00!
