

# All About Spheres!

The 3D ball shape.

**Color the spheres!** A sphere is round all the way around — no flat sides, no corners. That is why balls roll so well!

**Parent tip:** Roll a real ball while doing this sheet. Ask 'why does it roll so smoothly?' — the answer (round all over, no corners) IS the definition of a sphere.

**Color the spheres!**

Soccer ball

Tennis ball

Basketball

**Find & circle all the spheres!**

# Spheres in Real Life!

Can you find spheres around you?

 **Spheres are everywhere!** Look around your home — can you spot things shaped like spheres?
