

◆ 2D VS 3D SHAPES

Flat or Solid?

Match every pair!

◆ Draw a line matching each flat (2D) shape to its solid (3D) partner! 2D is flat like paper — 3D is solid like a real object you can hold.

👤 Parent tip: Hold a real ball next to a drawn circle while doing this. Feeling “flat like paper” versus “solid like a ball” makes the 2D/3D difference click instantly.

✏ Match the flat shape to its solid partner!

○ Circle (flat)

?

⚽ Sphere (solid)

■ Square (flat)

?

🎲 Cube (solid)

▲ Triangle (flat)

?

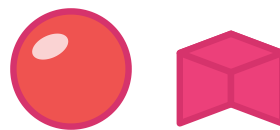

▲ Pyramid (solid)

👐 Sort: FLAT like paper or SOLID like a ball?

📄 FLAT (2D)

⚽ SOLID (3D)

👐 Touch test: Give your child a paper circle and a ball. Ask “which one can you pick up and turn all around?” — that is the 3D one!
